

VARIETY SHINE INTENSIVE PROGRAM JANUARY 2020

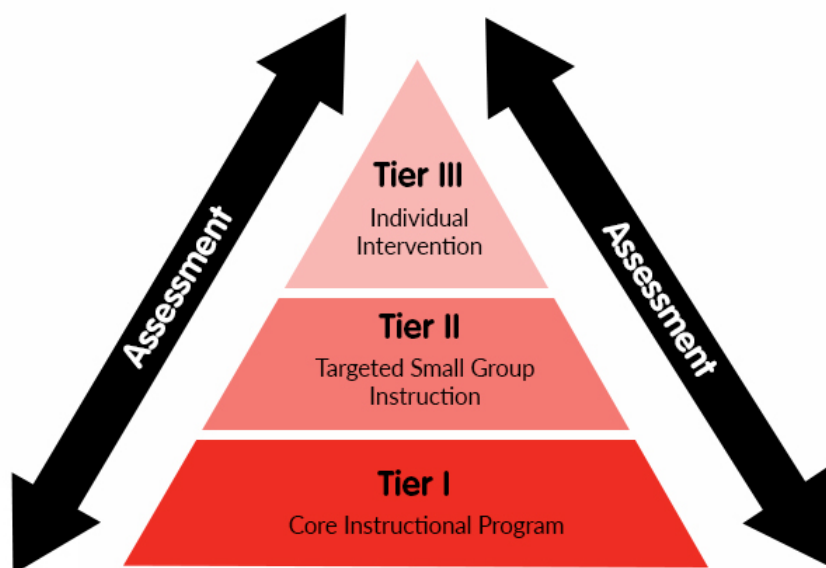

Assessment Program

4+ Years

We can do a comprehensive multidisciplinary assessment. This might take 2 or 3 days of tests and observations. If you have had previous testing done it helps us to determine what your child can and can't already do or what might be contributing to your child's speech, language, social skills, learning, and academic skills issues/problems.

The more information you give us, the more likely we will be able to set an appropriate goal to help your child improve without needing the full 2-3 days of testing.

Some programs may require additional assessment. If they haven't been completed by other professionals or the school, then we may have to do the assessments. The programs that require additional assessments include: **Language Programs, Social Communication Programs, Conversational & Lego Programs, Reading Programs, and/or Writing Programs.**

RUNS AS

Based on these assessments we then attempt to prioritise children who meet the Tier II criteria for a small group instruction and those in Tier III who require individualised instruction.

REQUIREMENTS

You are asked to provide us with copies of ALL their previous medical, Psychological, Therapy, and School (the last 2 most recent) reports. We also like to have a copy of the Schools Individualised Education Program (e.g. IEP or ILP or IPP) for your child. If your child has participated in NAPLAN testing, other testing in school or had an IQ test they must be attached to your application.

We prefer all students who attend our programs to have their hearing and vision assessed. We provide that service on-site during the program.

For children with a formal diagnosis of a Medical problem/condition, Autism Spectrum Disorder, Attention deficit Disorder (ADD) / Attention Deficit Hyperactive Disorder (ADHD), Anxiety Disorder or Depression (or other Mental Health conditions), or Behaviour Disorders we require a formal diagnosis and a copy of the professional reports.

TEAM

Occupational Therapists, Speech-Language Interventionists, Psychologists.
