

VARIETY SHINE INTENSIVE PROGRAM JANUARY 2020

Spelling Program

7+ Years

Spelling skills aren't expected to begin to be learned until about age 7 and beyond. This program aims to help those children who need help in this area. Many children have difficulty with learning the complex vowels used in spelling. Spelling can be an ingrained learned activity and sometimes we need to teach other strategies for spelling.

RUNS AS

The program is set to help each individual student in this area. If children are working on similar words or spelling strategies, they may be placed into a small group.

REQUIREMENTS

NAPLAN results are a good indicator of the development of spelling skills. In addition, there are a number of spelling tests that can be used to give us details about a child's development of spelling skills. These tests can be completed on the first day or two of the program.

TEAM

Speech-Language Interventionists.
